First edition.

How to Play

Kakuro is a crossword made of numbers. Fill every white square with a number from 1 to 9.

Each grey clue square has a diagonal line. The number above the line is the total of the white squares to its right (across). The number below the line is the total of the white squares beneath it (down).

A number can only be used once in each across or down run, so 4 in two squares must be 1 + 3, never 2 + 2.

Handy facts: 3 in two squares is always 1 + 2, and 17 in two squares is always 8 + 9.

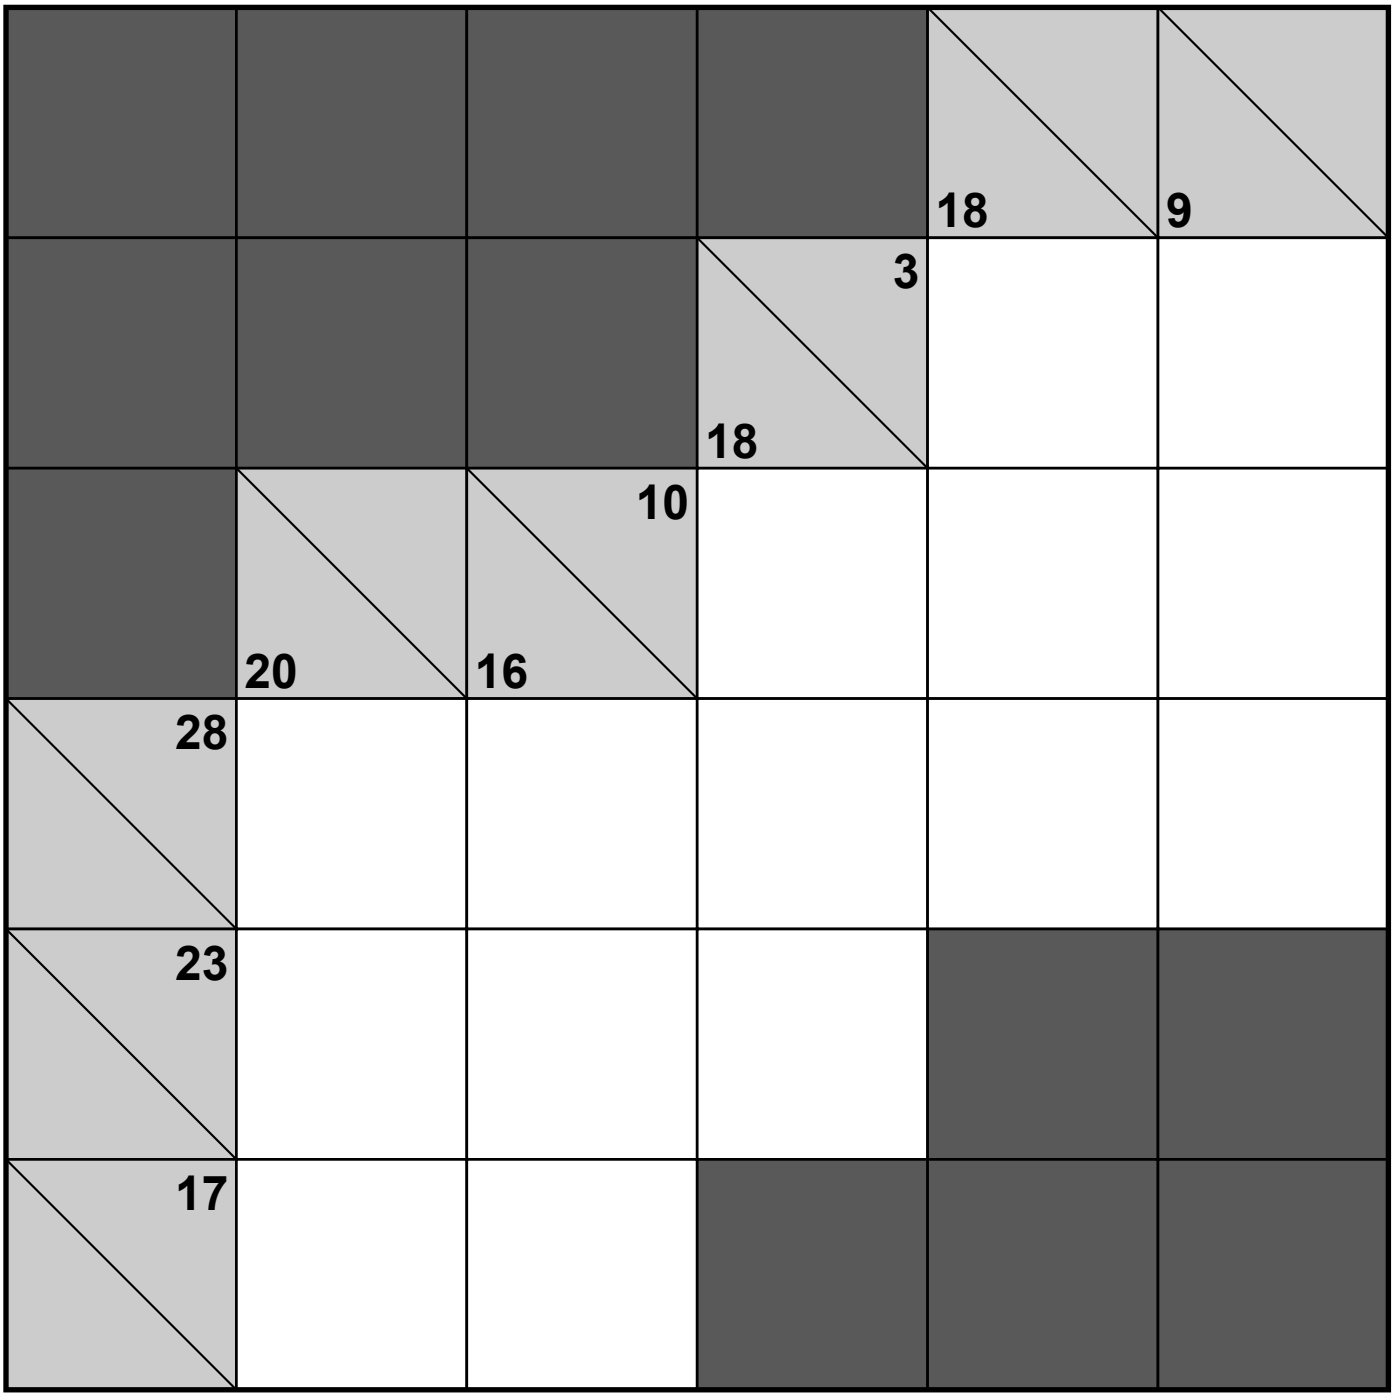

Every puzzle has exactly one solution, checked by computer. Answers are at the back.
