First edition.

How to Play

Fill the grid so every row, every column and every 3 x 3 box holds the numbers 1 to 9 once each.

Dotted shapes are called cages. The small number in the corner of a cage is the total of the numbers inside it. A number never repeats inside a cage.

Tip: every row, column and box adds up to 45. Use that to find the last number in a group of cages.

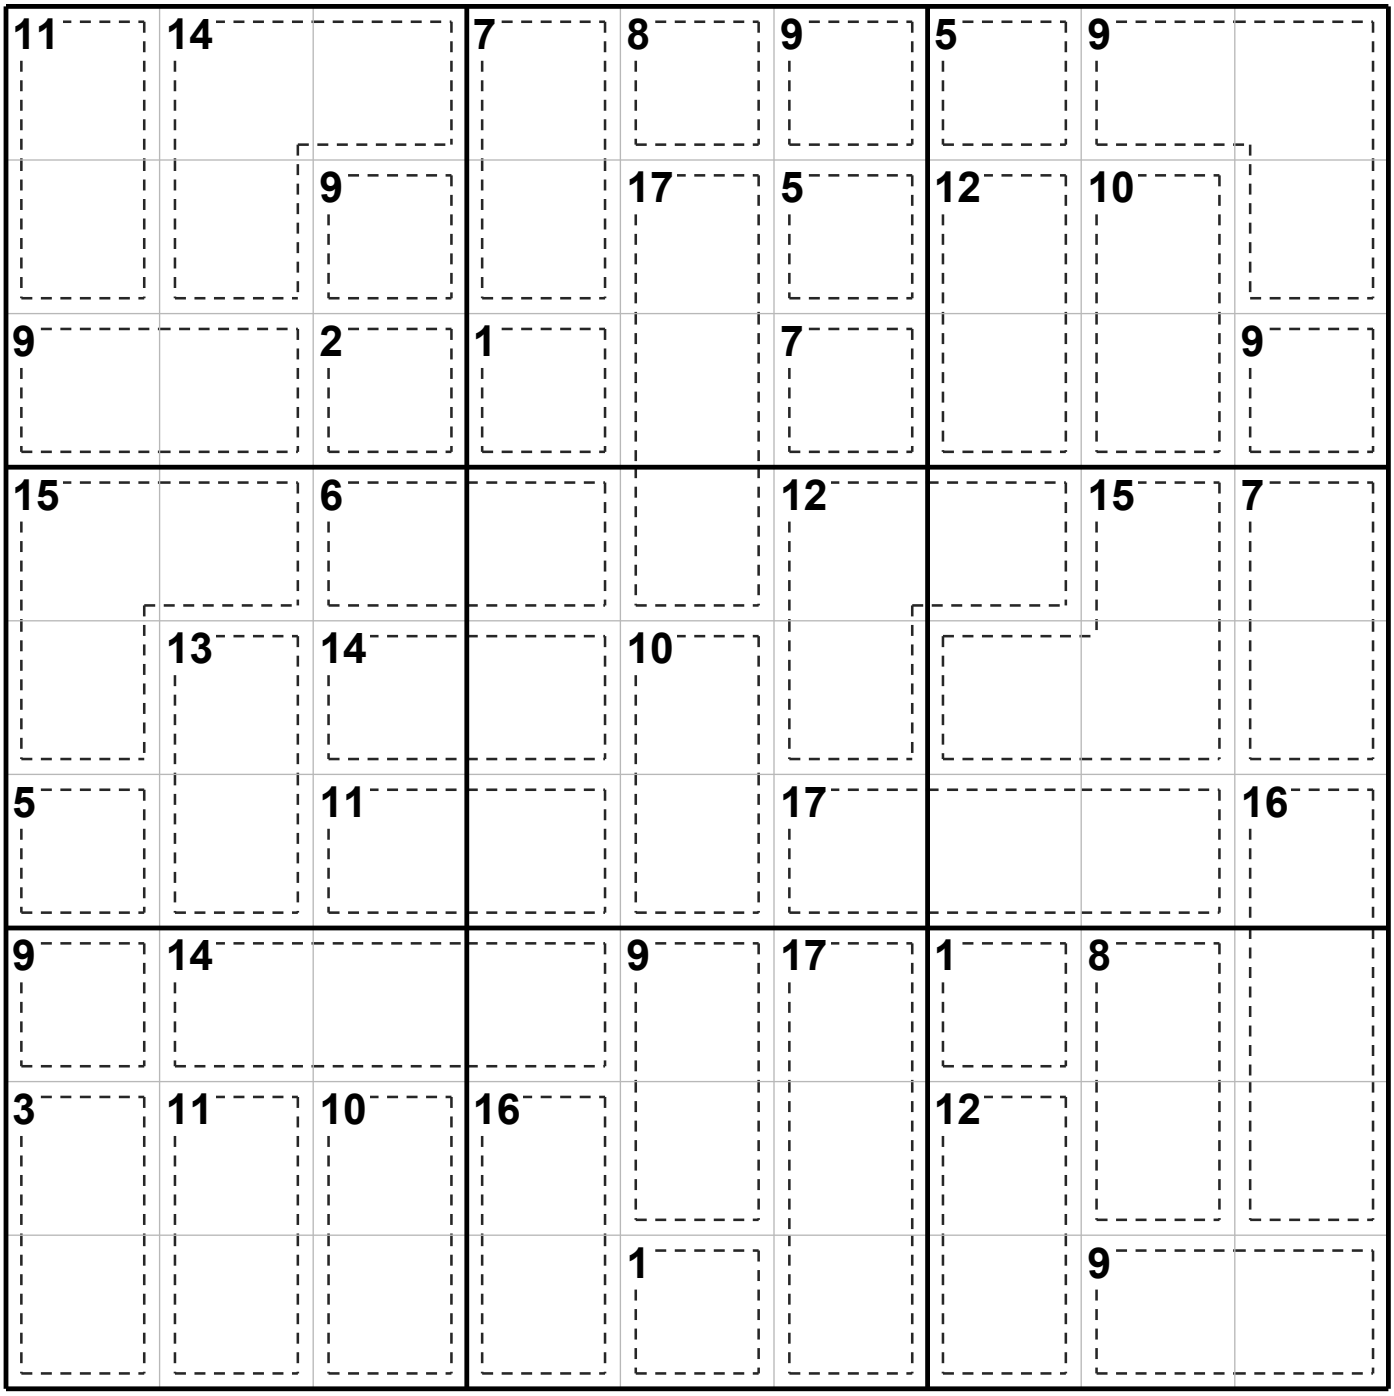

There are no starting numbers. The cage totals are all you need, and every puzzle has exactly one solution, checked by computer. Answers are at the back.
