How to Play

Each grid is a crossword made of sums. Write a number in every empty white square so that every row and every column works out to the answer shown after the equals sign.

In a 3 x 3 grid use each number from 1 to 9 once. In a 4 x 4 grid use each number from 1 to 16 once. Grey squares are numbers we give you.

Work each line from left to right, or top to bottom, one step at a time: 3 + 5 × 2 means 3 + 5 = 8, then 8 × 2 = 16.

Magic squares: fill the square with 1 to 9 (3 x 3) or 1 to 16 (4 x 4) so every row, column and both diagonals add up to the magic total.

Every puzzle has exactly one solution, checked by computer. Answers are at the back.
