First edition.

How to Play

Every puzzle is a map of squares with a few numbered stations. Your job is to lay one train track.

Rule 1: the track starts at station 1 and ends at the station with the highest number.

Rule 2: the track passes through every square of the map exactly once. It moves up, down, left or right into the next square, never on a diagonal, and it never crosses itself.

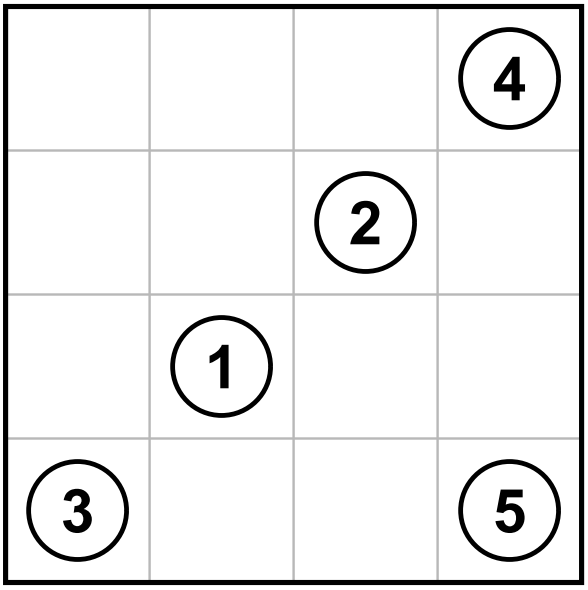

Rule 3: the track reaches the stations in number order: 1, then 2, then 3 and so on.

Tip: start near the corners and the edges. A corner square has only two ways in, so the track must use both of them unless a route starts or ends there. Draw short bits you are sure of first.

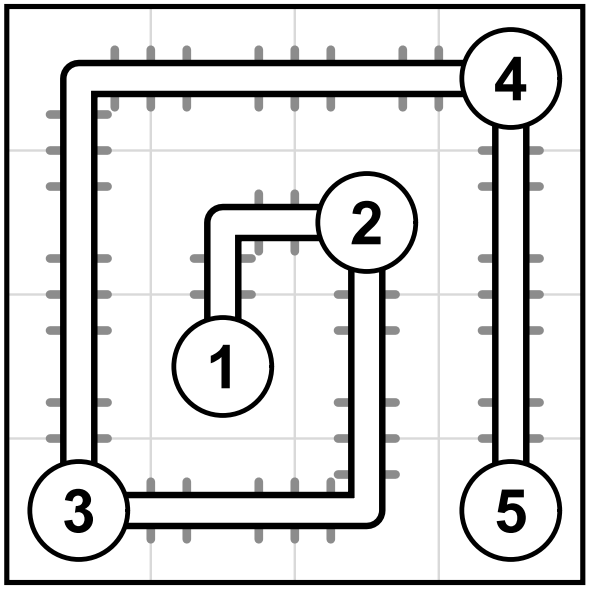

Every puzzle was checked by computer: there is exactly one track that follows all three rules. Solutions are at the back of the book.

Example

Here is a small 4 x 4 map and its one track. Follow it from station 1: it visits all 16 squares and meets the stations in order.

Puzzle

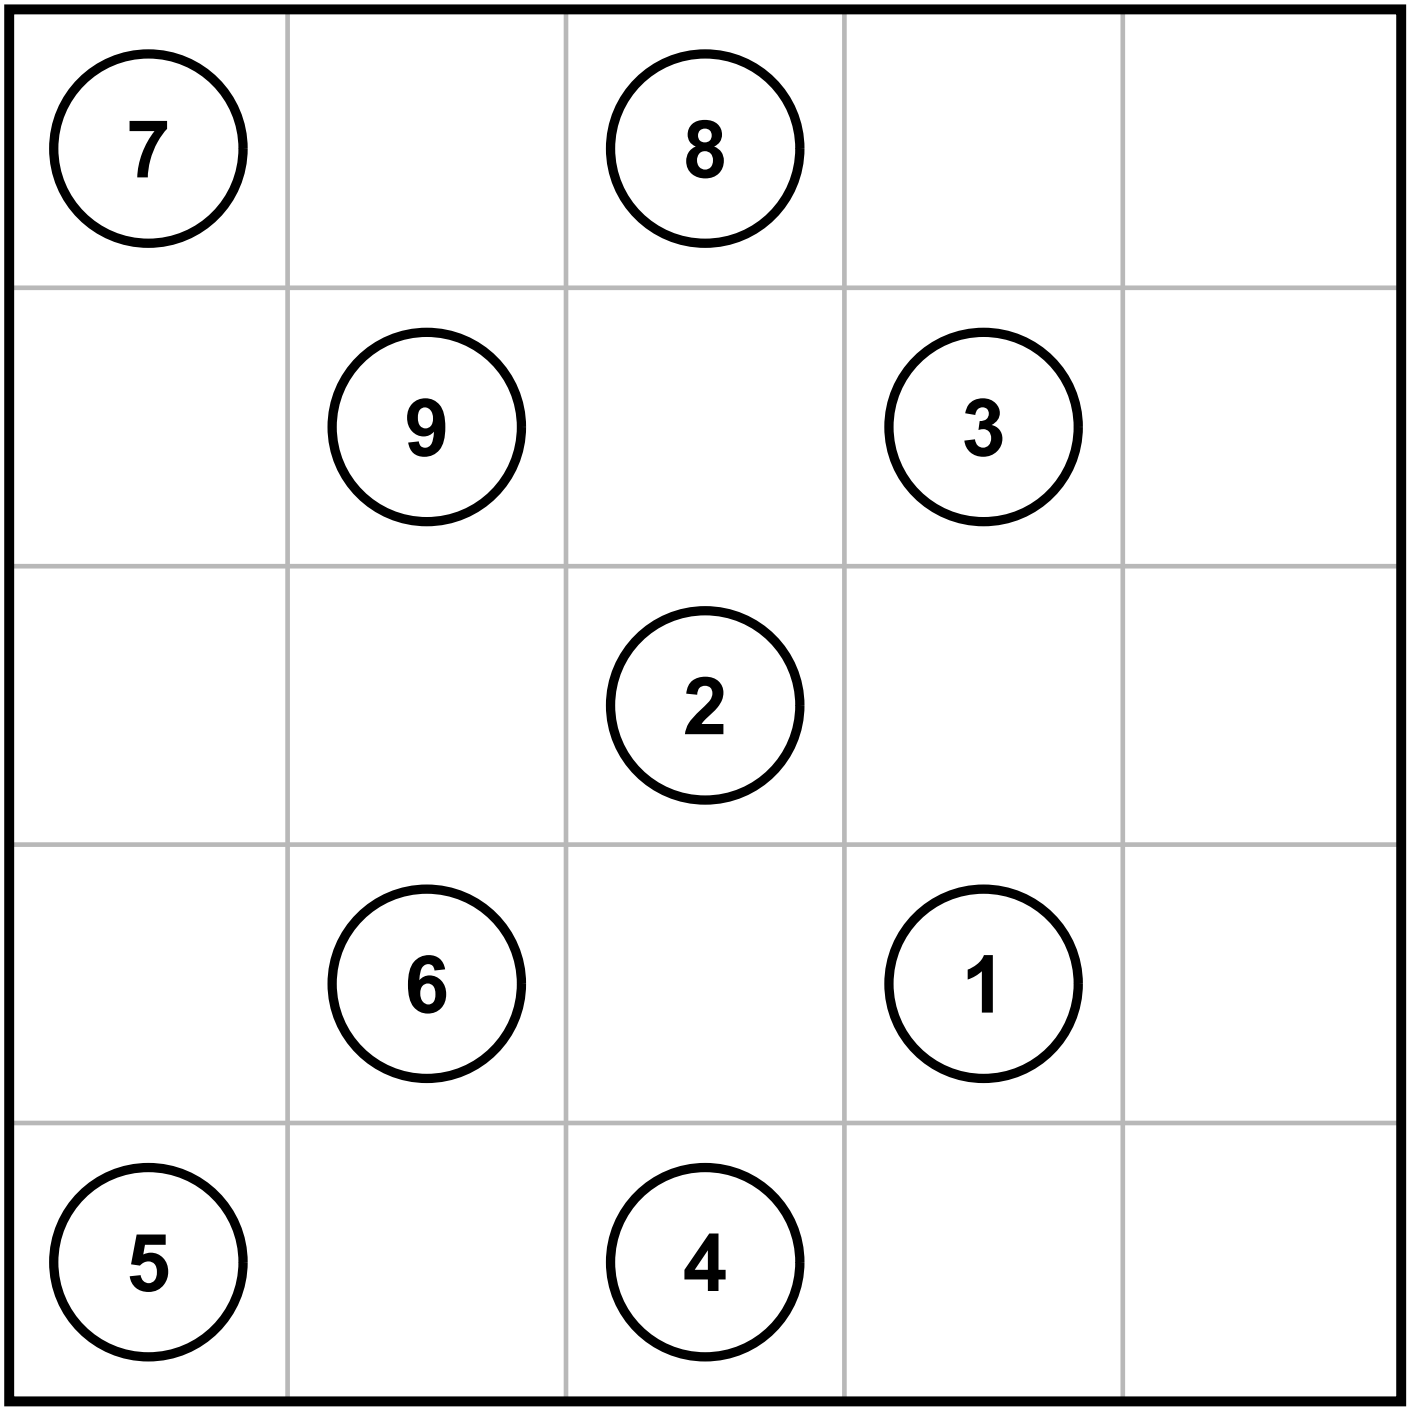

Solved

Easy Puzzles

5 x 5 and 6 x 6 maps

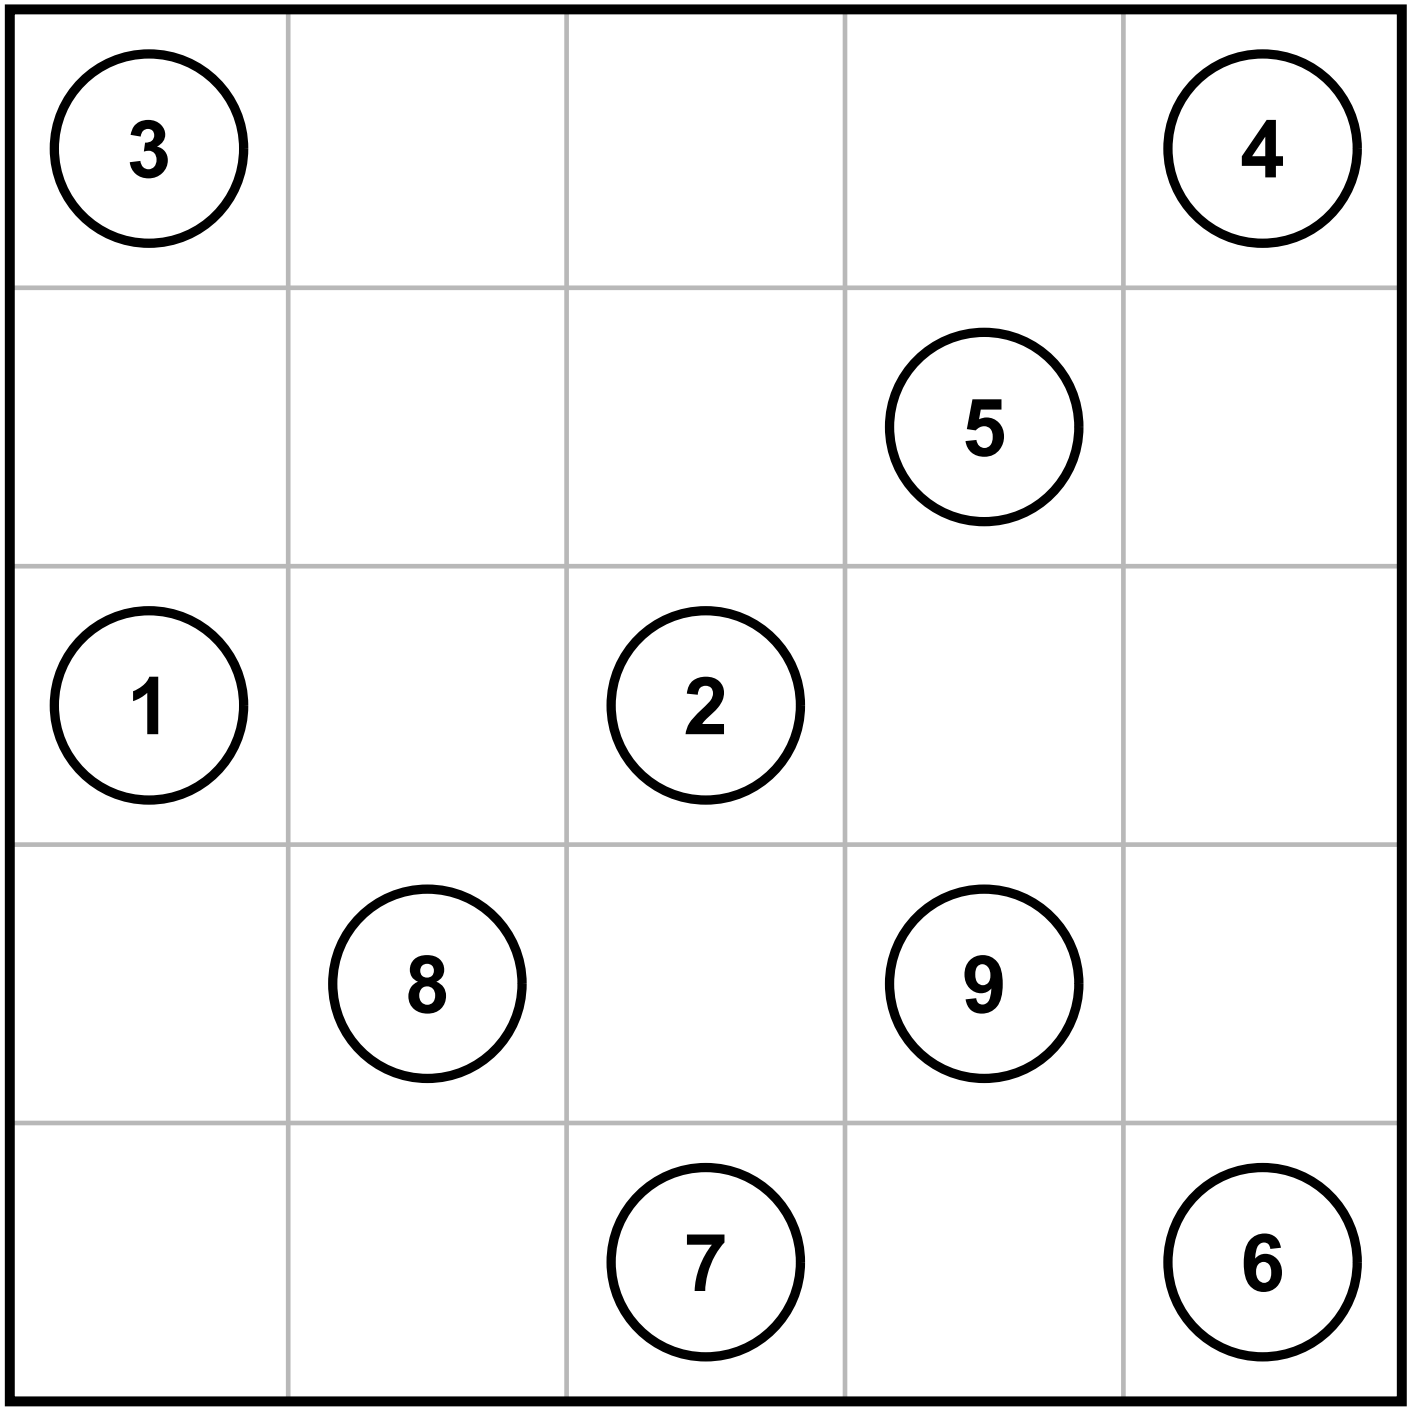

PUZZLE 1 Easy | 5 x 5 | 9 stations

Draw one track from station 1 through every square, meeting the stations in order.

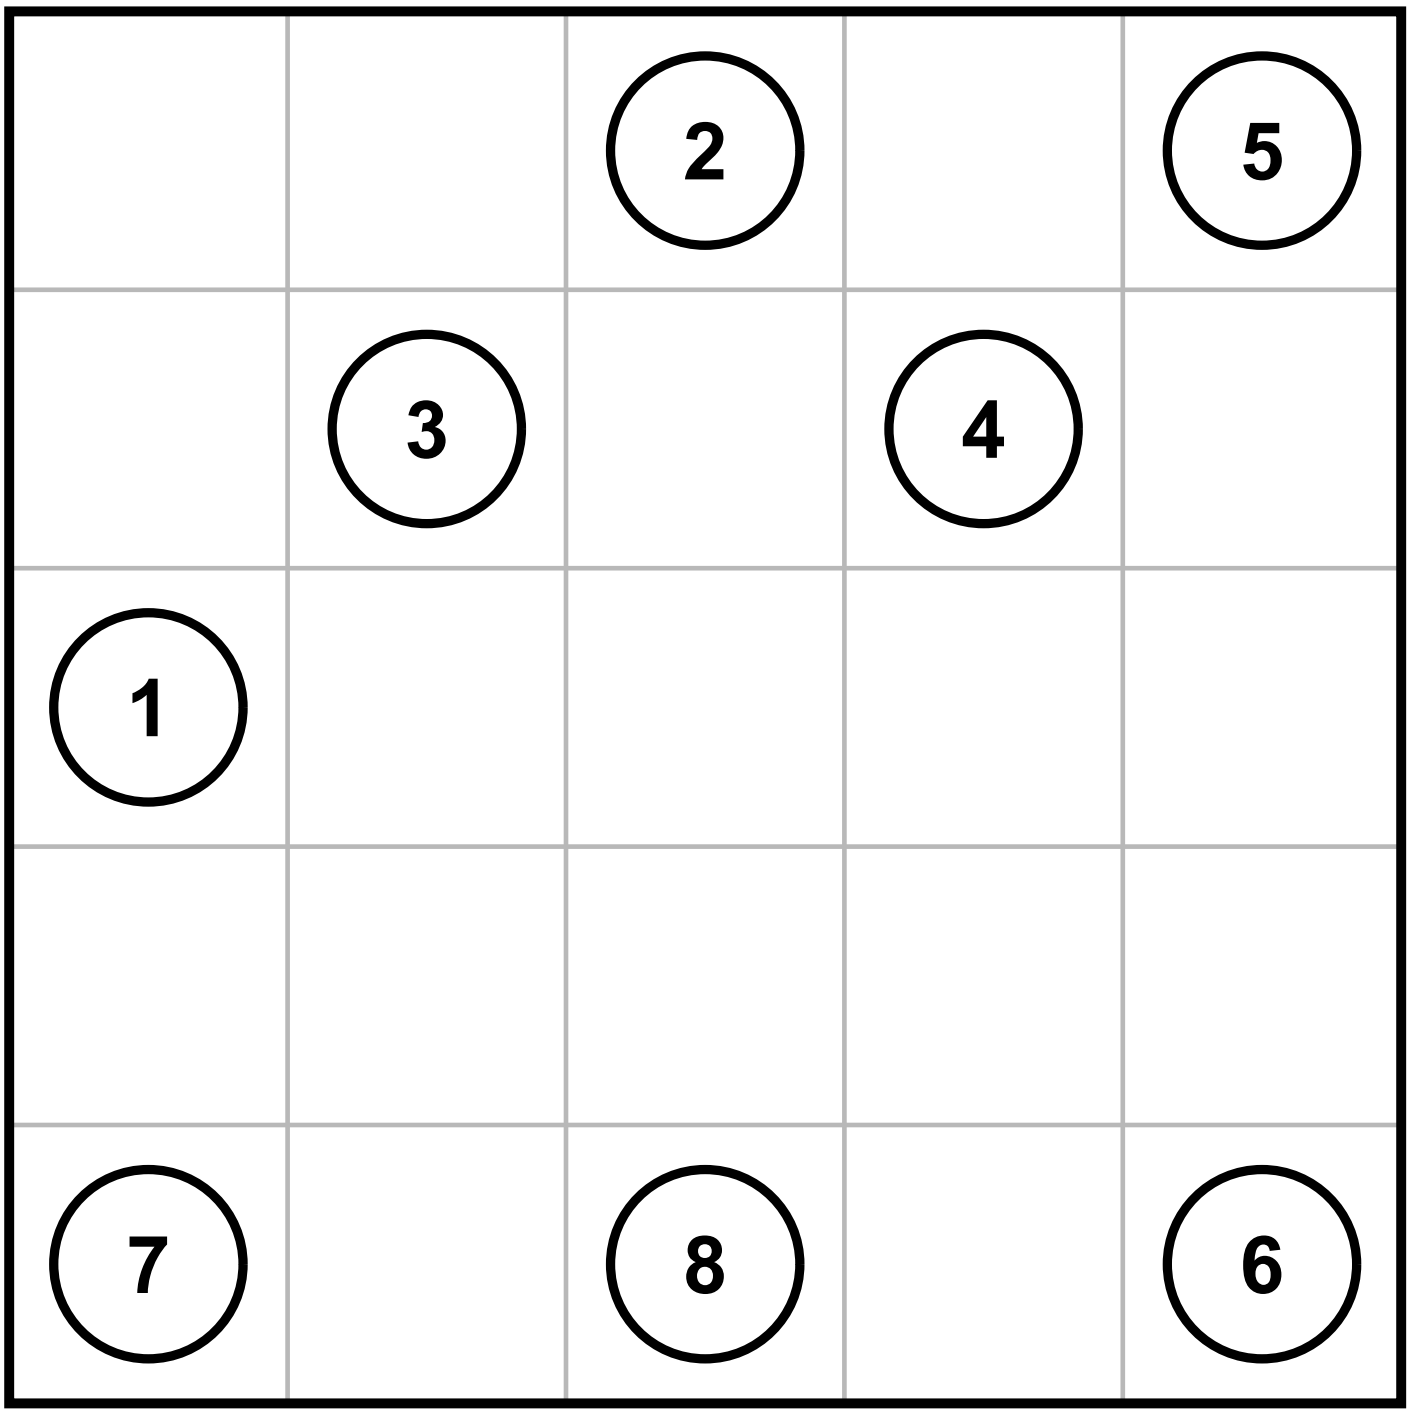

PUZZLE 2

Easy | 5 x 5 | 9 stations

Draw one track from station 1 through every square, meeting the stations in order.

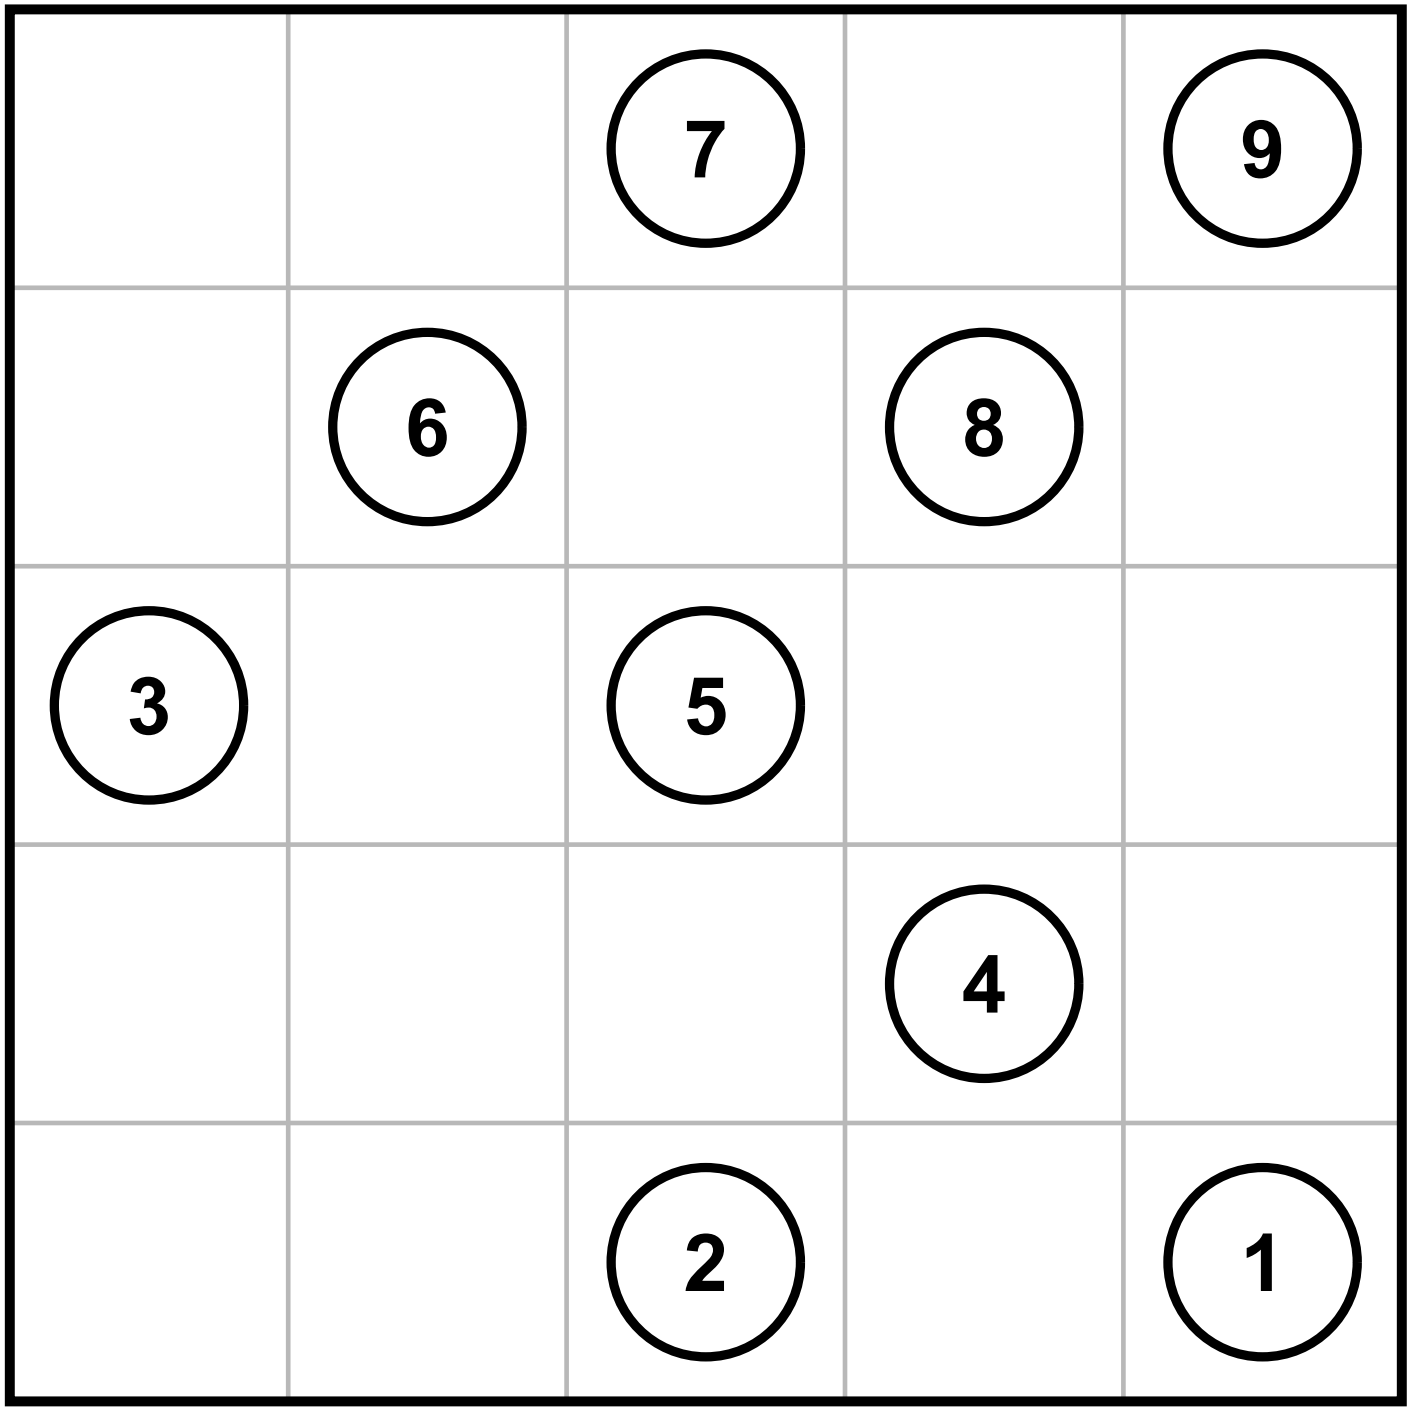

PUZZLE 3 Easy | 5 x 5 | 8 stations

Draw one track from station 1 through every square, meeting the stations in order.

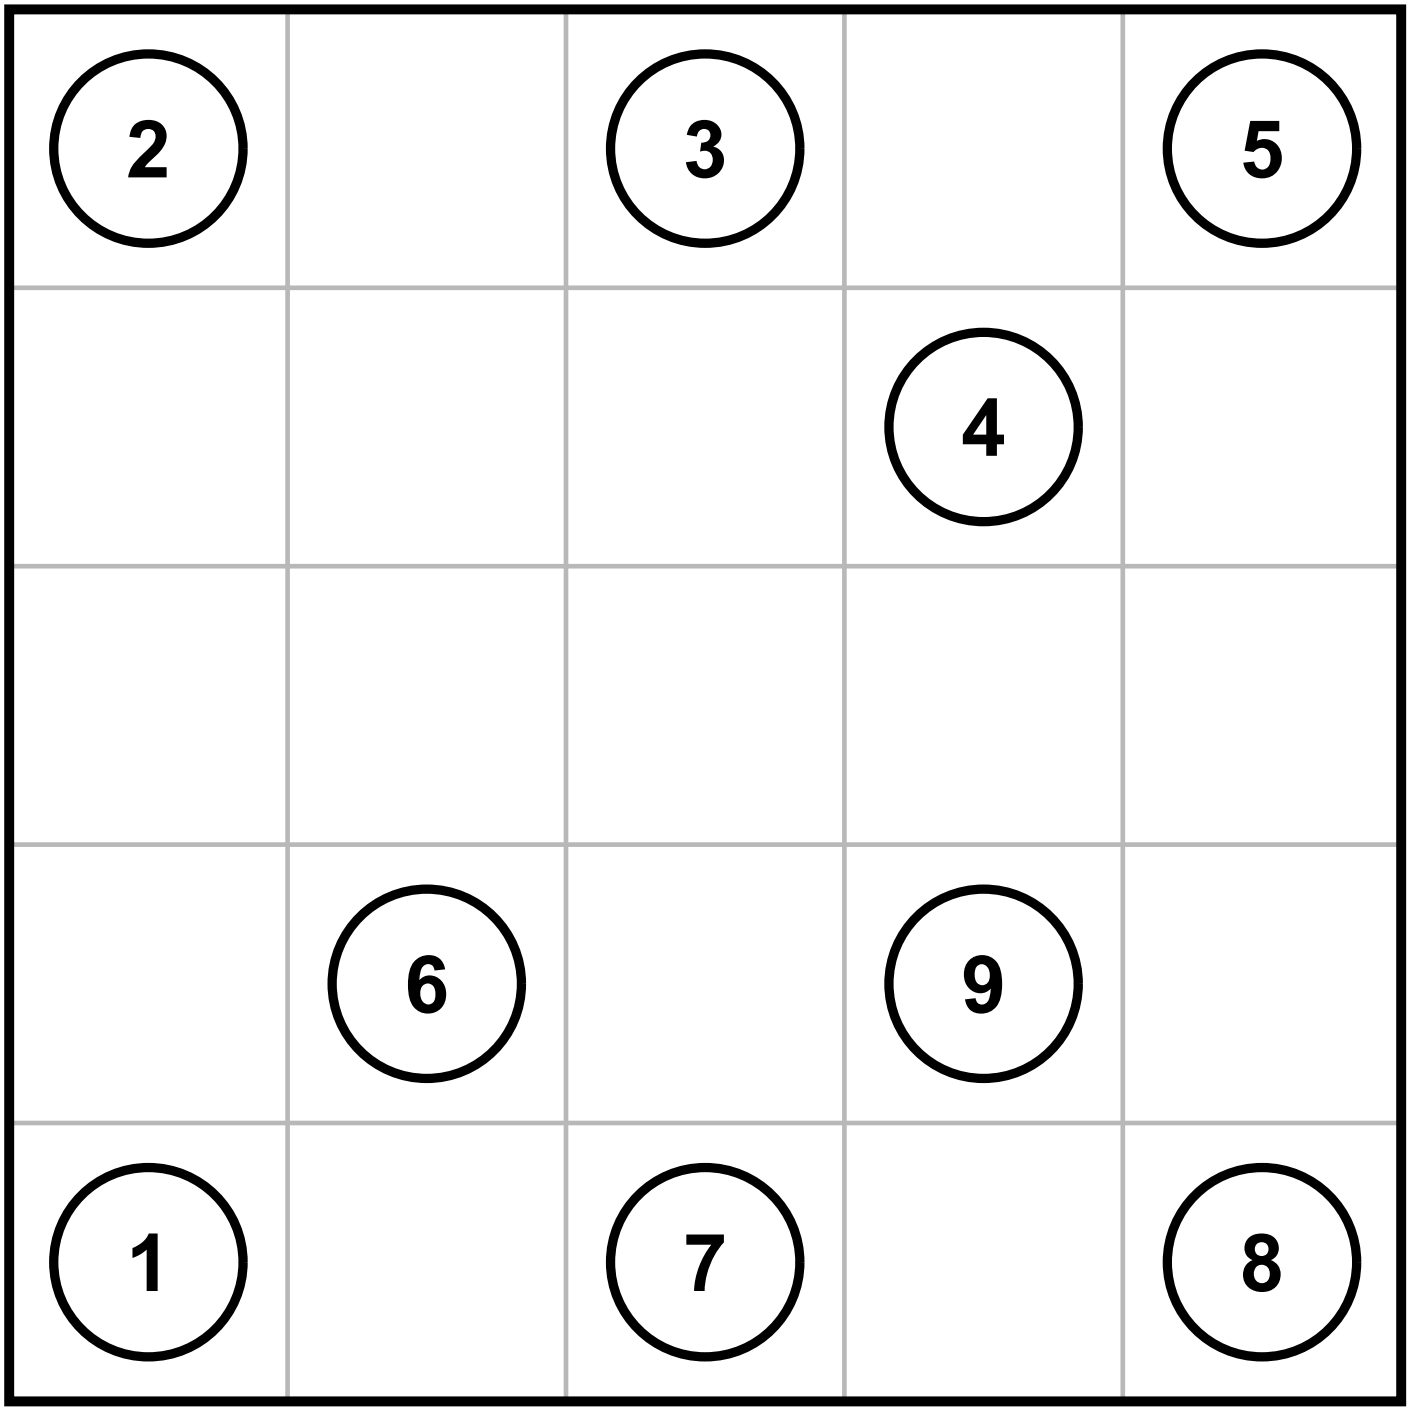

PUZZLE 4

Easy | 5 x 5 | 9 stations

Draw one track from station 1 through every square, meeting the stations in order.

PUZZLE 5 Easy | 5 x 5 | 9 stations

Draw one track from station 1 through every square, meeting the stations in order.
