First edition.

How to Play

Fill in squares to reveal a hidden picture. The numbers beside each row and above each column tell you the lengths of the runs of filled squares in that line, in order.

Between two runs there is always at least one empty square. Mark squares you know are empty with a small dot.

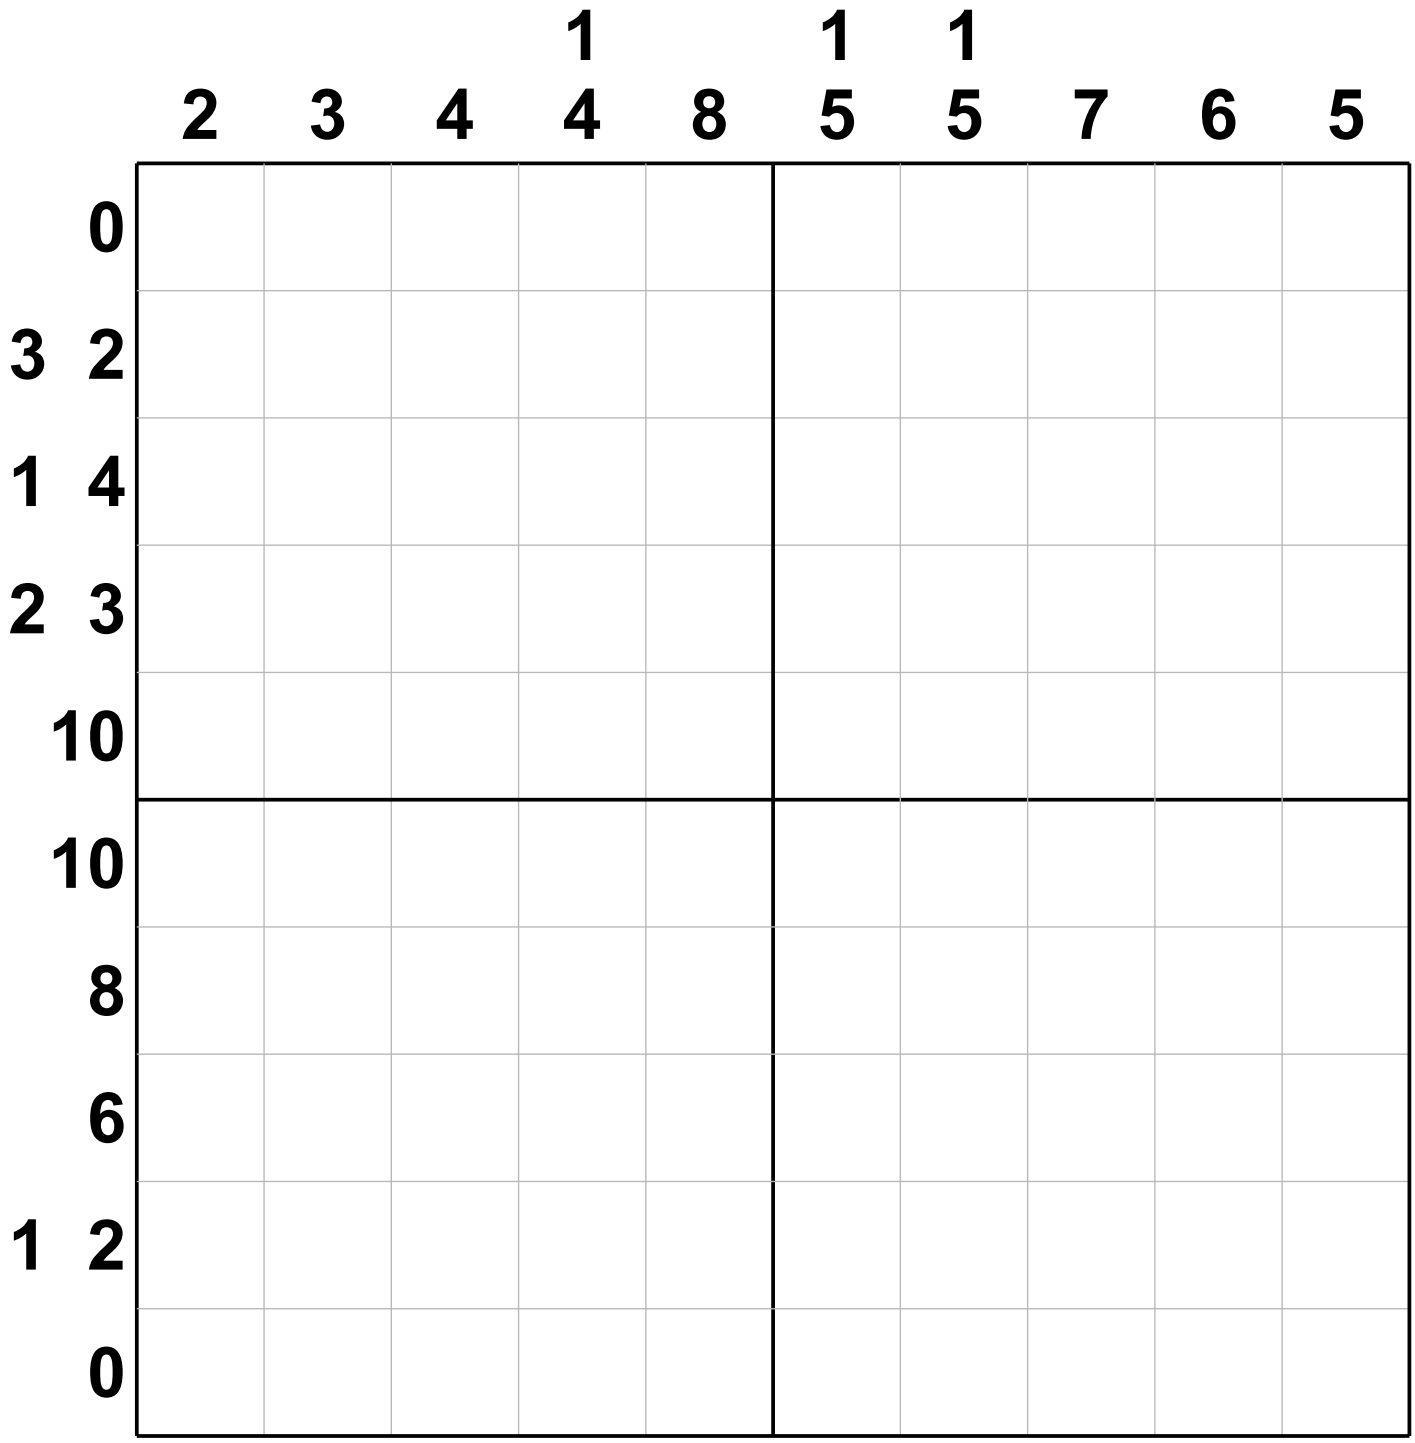

Every puzzle can be solved by logic alone, one line at a time, with no guessing (checked by computer), and has only one answer.

Grids get bigger as you go. The finished pictures are at the back.
